Work Experience

Total Holiday Options

April 2023 - Present

Software Developer

Develop and maintain new features for the company's core multi-regional Travel ERP. Build and optimize Laravel REST APIs for web and mobile applications. Enhance hotel, transport, activity, accounting, and inquiry modules while improving application performance and reliability. Mentor junior developers, conduct code reviews, and implement document generation and UI enhancements.

Key Projects

- **Dynamic Quote & Tour Management:** Implemented quotation, itinerary, and real-time tour costing features with optimized backend logic.
- **India DMC (B2B Platform):** Designed and developed the frontend using Next.js, integrated Laravel REST APIs, and built CMS-based tour and inquiry management.
- **Tailor-Made India (B2C Platform):** Developed the platform from scratch, including frontend, backend, REST APIs, lead management, and customized tour costing.
- **Total Holiday Options:** Designed the responsive frontend and integrated REST APIs for dynamic tour packages and content management for Australia & New Zealand.

Pjobjects

Personal Portfolio Website

Tech Stack: Next.js, Tailwind CSS, Vercel

Designed and developed a personal portfolio website to showcase projects, technical skills, and professional experience. Implemented a responsive UI with modern design practices, optimized performance, and deployed the application on Vercel.

EventBano – Event Booking Website

Tech Stack: Laravel, MySQL, Bootstrap

Developed a responsive event website for showcasing services and generating customer inquiries. Built event management and inquiry handling features with an optimized user interface and deployed the application on Hostinger.

MLM Management System

Tech Stack: Laravel, MySQL, Bootstrap

Developed a web-based MLM management system with admin dashboard and data management features. Implemented secure CRUD operations, user management, and optimized database interactions.
